## A virtualisation breakfast briefing

Foundation IT invites you to attend our Technology Breakfast Briefing on the 'Virtualisation Maturity Model'

Our CEO, Mr Simon Walker, an IT industry leader would like to share his vision for how virtualisation is going affect your IT strategy. The Virtualisation Maturity Model is Simon's own view on where virtualisation is heading and how this can benefit you and your organisation.

You will have the opportunity to explore options for the future, including what can be done today; Simon will demonstrate some immediate benefits using your own IT infrastructure as an example.

This will be a low key event at our offices in Oare, where we are inviting only a small group of people.

Register now at Foundation IT Events
